Annexure 11	List of existing policies relevant to the Food Safety Policy	46
Annexure 111	List of Contributors	47

Acronyms

ADB	Asian Development Bank
CAA	Consumer Affairs Authority
CBSL	Central Bank of Sri Lanka
CCC	Ceylon Chamber of Commerce
CFA	Chief Food Authority
DAPH	Department of Animal Production & Health
DGHS	Deputy Director General of Health Services
DFAR	Department of Fisheries & Aquatic Resources
DGHS	Director General of Health Services
DoA	Department of Agriculture
DoC	Department of Commerce
DoEA	Department of Export Agriculture
DTIP	Department of Trade & Investment Policy under MoF
EDB	Export Development Board
EU	European Union
FAC	Food Advisory Committee
FAO	Food & Agriculture Organization
FBO	Food Business Organizations
FCAU	Food Control Administration Unit
FSB	Food Safety Bureau
FPA	Food Processors Association
GAP	Good Agricultural Practices
GHP	Good Hygienic Practices
GMP	Good Manufacturing Practices

GAHP	Good Animal Husbandry Practices
HACCP	Hazard Analysis and Critical Control Point
HARTI	Hector Kobbakaduwa Agrarian Research & Training Institute
ICTA	Information Communication Technology Agency
IDB	Industrial Development Board
INFOSAN	International Food Safety Authorities Network
ISO	International Organization for Standardization
ITI	Industrial Technology Institute
MoA	Ministry of Agriculture
MoF	Ministry of Fishery
MoH	Medical Officer of Health
MoI	Ministry of Industries
MOP	Ministry of Plantations
MOT	Ministry of Trade, Commerce and Food Security
MRI	Medical Research Institute
MRL	Maximum Residue Limits
NARA	National Aquatic Resources and Development Agency
NFS	National Fertilizer Secretariat
NPQS	National Plant Quarantine Service
NTFC	National Trade Facilitation Committee
PHI	Public Health Inspector
RASFF	Rapid Alert System for Food and Feed
RRI	Rice Research Institute
SLAB	Sri Lanka Accreditation Board
SLSI	Sri Lanka Standards Institute
SME	Small and Medium Enterprises
SOP	Standard Operational Procedure
SPS	Sanitary and Phytosanitary aspects related to WTO

TBT	Technical Barriers to Trade agreement related to WTO
UN	United Nations
UNIDO	United Nations Industrial Development Organization
USAID	United States Agency for International Development
WB	World Bank
WHO	World Health Organization
WTO	World Trade Organization

1. INTRODUCTION

The World Health Organization (WHO) and Food and Agriculture Organization (FAO) define a food commodity as safe when free from all hazards, which may make food injurious to the health of the consumers whether for chronic or acute consequences (FAO 2003). This concept may assume a number of conjugations that include both microbiological, chemical and physical hazards and nutritional aspects.

The food trade has evolved rapidly in the recent past because of emerging economic policies, industrialization, globalization, urbanization, and online trade. The processed food market is growing, while more people are relying on commercially available ready-to-eat food. In the meantime, more chemical substances are used at the agricultural and animal husbandry level. Hence, the use of chemicals at the primary food production level and various stages of processing, storage and transport poses a challenge for food safety under this situation.

Safe food is a primary determinant of human health and having access to safe, quality and healthy food is a basic human right. Assurance of food safety is a key driving force for better human health and for trading of safe and quality food. It is vital to highlight that food security cannot be achieved without food safety, and therefore food security and food safety are inextricably linked.

1.1 **Background**

Food Safety is a key component of the public health and falls under the mandate of the Ministry of Health (MoH). The food safety control system of the country currently operates based on the legislative framework stipulated under the Food Act enacted by the Parliament in 1980. Accordingly, the main administrative responsibility for food safety lies with the Ministry of Health (MoH), with the Director General of Health Services serving as the Chief Food Authority (CFA). In addition, there are food authorities, identified by the Food Act. Food Authorities are persons responsible to ensure the implementing of the Food Act and its regulation to ensure food safety in his administrative area / sector as specified by the Food Act. The Food Control Administration Unit (FCAU) is the central body under the Ministry of Health that oversees and coordinates food safety in the country.

Different food safety data reveal that there is a gap in controlling contaminants that are originating at the primary food production level, food processing and storage level or unsatisfactory cold chain maintenance during the food chain.

1.2 Purpose & Context

The current country context in relation to food is defined by the expansion of the global food trade, new concepts, agreements, and interactions as well as lifestyles and consumption habits. This has changed the food safety focus and approaches to accept international food standards and norms.

Foodborne diseases still remain as a public health problem. Although, food regulations to maintain Good Manufacturing Practices (GMP) and Good Hygienic Practices (GHP) are in place, implementation of such regulations such as Food (hygiene) and Food (premises registration) regulations are relatively poor compared to the implementation of other food regulations. Hence, priority should be given to implementing GMP and GHP according to the regulations throughout the food chain and Hazard Analyses and Critical Control Point (HACCP) should be strengthened to prevent food borne illnesses.

The lack of knowledge and financial constraints to invest better food safety mechanisms are potential reasons specially in the Small and Medium Enterprises (SME) sector as well as in street food sector. Lack of formal food handlers' registration system following a basic food safety training have also been identified as a gap in the system. Inadequate laboratory facilities especially in the government sector, seriously impact ensuring domestic food safety control. Lack of a reference food laboratory and inadequate laboratory facilities to implement newly developed food regulations have been identified as major issues related to food testing. In addition, lack of human capacity at the government laboratories have led to utilization of private food laboratories which has created potential food safety issues, especially at the border control.

All players of the food chain need varying levels of information and capacity to ensure food safety. It could vary from basic food safety knowledge to scientific risk analyses, management, and risk communication as well as practical knowledge on monitoring and implementation of risk management system such as HACCP. Therefore, it is emphasized that capacity building of the players of the food chain is a priority and a responsibility of all relevant sectors, including food industries.

Food transport and storage is a segment of the food chain which has been identified as poorly regulated and not directly under any key government agency. Therefore, special focus should be made to prevent food safety during food storage and transport, especially for perishable food and food with high risk of fungal growth resulting in toxin contamination. Many informal food outlets, cooked food transportation and food redistribution mechanisms have commenced following the COVID-19 pandemic and economic crisis. Accordingly, new food safety issues and challenges have begun during the recent past. Therefore, assurance of food safety in these new food innovations including street food sector require specific food safety measures.

As food safety information are very sensitive, only the proven and estimated risks must be communicated to the community to avoid unwarranted fear which may cause undue public unrest and food insecurity. Formal risk analysis is the scientific method behind risk assessment, risk management and risk communication which need a specially trained team and resources. However, the lack of capability on risk analysis of food safety hazards is a major drawback in the current context. The lack of efficient systems to address social unrest and public complaints also have been identified as a key issue in the current food safety system.

Unethical food marketing practices and the promotion of food that are not identified as a component of a healthy diet, specially to pregnant and lactating mothers and children have been identified as another problem, which has been proven as one determinant for child obesity and long-term health consequences. Global evidence shows that availability of robust regulations and strict enforcement restricts consumption of unhealthy food. Therefore, it is emphasized and expected food industries to understand their national responsibility related to food marketing, comply with food regulations and maintain food ethics in fair trade.

1.3 Rationale

Despite a widened scope of the food sector and its operators, at present, there is no available policy on food safety to guide and streamline the food safety system at the national level. Ensuring the safety of food is essential for maintaining an acceptable standard of healthy living. Hence, it is government's responsibility to establish a sustainable system that ensures the safety and quality of food available for both national and international consumers. Hence, a robust food safety control mechanism should be introduced incorporating new approaches to the existing system and in aligned with international food safety management systems to increase consumer acceptance locally and globally.

Some major issues identified in the existing food control system include inadequate responsibility and accountability for food safety by key stakeholders, deficient intersectoral monitoring and coordination mechanism, lack of adequate laboratory facilities and inadequate implementation of food safety activities due to lack of officers exclusively dedicated for food safety at the national and peripheral levels.

Food safety cannot be achieved only through end-product testing. Hence, preventative measures must be implemented throughout the food chain as many food safety hazards are originating somewhere at the food chain from farm to table. It is important to note that some of the contaminants such as aflatoxins, heavy metals and pesticide residues originating at the primary food production level, and cannot be rectified at a later stage. Therefore, ensuring food safety at the primary food production level are essential with special emphasis on promoting Good

Agricultural Practices (GAP) and Good Animal Husbandry Practices (GAHP), through establishing district food authorities at the primary food production level and empowering them under the Food Act. Strengthening preventative food safety approaches at all levels would ensure not only the food safety, but food security and facilitation of safe food export. The Situational Analysis Report (2023) on food safety control system in Sri Lanka was prepared under the overall supervision of the Ministry of Health in collaboration with Food and Agriculture Organization and funded by the European Union. The report highlighted several structural and operational deficiencies, including inadequate staffing, lack of specialized technical expertise, and fragmentation across multiple technical units. The report recommended establishing a Food Safety Bureau under the Chief Food Authority (DGHS). As such the Food Act is to be updated providing provisions to establish a high level multisectoral committee (Food Safety Council) with sharing responsibility and accountability of ensuring food safety of the country. The legal power under the Food Act for supervising and monitoring of the district level food authorities to be given to the relevant department heads who would represent the Food Safety Council. Monitoring and coordination committees also need to be included to the existing food safety framework for effective monitoring, coordination and implementation of the food safety policy and strategies. Well-established food safety systems contribute to improved public health, increased food security, protection of environment, increased demand for food trade and promote sustainable economic development.

2. POLICY PRINCIPLES

1. Access to safe, quality, and healthy food through governance and surveillance.
2. Risk-based, evidence- driven, preventative food safety approaches.
3. Public health approach and multi-sectoral collaboration for food safety.
4. Community engagement and empowerment.
5. Transparency, traceability, and equity of food safety system.

3. POLICY STATEMENTS

1. A national food safety governance framework in place to ensure safe and quality food to promote and protect public health and facilitate domestic and international food trade.
2. Food safety legislation and standards across the food chain are aligned with scientific evidence and national requirements.
3. National food safety surveillance and, risk analysis, are in operation to respond to food safety emergencies and challenges.
4. Sustainable mechanisms established to implement food safety policy and to address food safety challenges effectively.

4. POLICY GOALS

Ensure safe, healthy, and quality food to protect health of national and international consumers and to develop economic growth through a coordinated, collaborative, and accountable approach among stakeholders throughout the food chain.

5. APPLICABILITY & SCOPE

The Ministry of Health (MoH) is mandated with ensuring food safety in the country. Hence, the policy recognizes Director General of Health Service as the Chief Food Authority (CFA) and Chair of the proposed Food Safety Council. MoH collaborates and coordinates with other relevant agencies including private sector and consumers to promote and protect public health and to facilitate fair food trade.

Food safety has a broader concept and encompasses prevention of consumers from all kinds of health hazards in food. The food safety policy covers the entire food chain, including primary production sectors incorporating small, medium, and large enterprises, transportation, storage, processing, preparation, advertising, sale, and distribution for consumption to ensure safe, quality, and healthy food through promulgation and enforcement of appropriate laws and regulations, aligned with scientific evidence and country requirements. The policy integrates all pertinent sectors and stakeholders, both from the government and private entities emphasizing shared responsibility and accountability. The policy also engages and empowers the community with food safety information, education, and communication.

Furthermore, the policy guides the provincial, district and divisional bodies to ensure effective policy implementation through monitoring and coordination at central and peripheral level. This policy is coherent with the upcoming National Policy on Health and Wellbeing 2026-2035 and other health policies such as National Nutrition Policy 2021-2030 and National Policy on Maternal Child Health. It also complements other policies related to food safety and global needs leading to an improved food safety management system.

6. POLICY IMPLEMENTATION

The National Food Safety Policy is planned to be implemented over a period of ten years from 2025 to 2035. The Ministry of Health and Mass Media is the leading authority to oversee the implementation of the policy in close collaboration with other responsible agencies and consumers.

6.1 Strategies

1 Strengthen institutional framework and preventive food safety approaches in food production sectors
2 Ensure the safety of the domestic, import and export food, while assuring food security
3 Strengthen Food safety legislation, standards, guidelines, codes of practices, and standard operating procedures
4 Strengthen food safety surveillance, risk analysis and respond to food safety emergencies and challenges
5 Capacity development of stakeholders throughout the food chain, risk communication, research and development on healthy and safe food to the consumer
6 Establishment of mechanism for sustainable implementation and monitoring of food safety policy.

Strategy 01 - Strengthen institutional framework and preventive food safety approaches in food production sectors

Sub Strategies

1.1 Strengthen existing institutional framework to support food control systems at all levels.
1.2 Strengthen preventive food safety approaches in primary food production sectors.
1.3 Strengthen preventive food safety approaches in industrial food production sectors.

Strategy 02 - Ensure the safety of the domestic, import, export food, while assuring food security.

Sub Strategies

2.1 Strengthen mechanisms to ensure domestic food safety
2.2 Ensure imported foods comply with country food safety requirements.
2.3 Strengthen mechanisms to promote exportation of safe food
2.4 Strengthen risk-based food import inspection system
2.5 Ensure food security, environmental safety and support the climate change issues.

Strategy 03 – Strengthen Food safety legislation, standards, guidelines, codes of practices, and standard operating procedures.

Sub Strategies

3.1 Develop and update food legislations including Food Act.
3.2 Develop and update food standards, guidelines, codes of practices, SOPs and food ethics.
3.3 Strengthen monitoring and enforcement of food legislation.

Strategy 04 – Strengthen food safety surveillance, risk analysis and respond to food safety emergencies and challenges

Sub Strategies

4.1 Establish a centrally coordinated, an integrated food safety surveillance and information system.
4.2 Strengthen analytical capacity of food laboratory system and laboratory network
4.3 Establish a formal risk assessment, management and communication system.
4.4 Improve responding mechanisms for food safety emergencies and challenges resulting from local and global changes.

Strategy 05 - Capacity development of stakeholders throughout the food chain, risk communication, research and development on healthy and safe food to the consumer

Sub Strategies

5.1 Enhance the capacity of stakeholders along the food chain
5.2 Strengthen risk communication system and public awareness on healthy and safe food.
5.3 Promote research and development on food safety and integrate findings into policy and practice.
5.4 Disseminate evidence based scientific information for improvement of food safety and for integration of findings into policy and practice
5.5 Strengthen consumer awareness on food safety through health education and Social and Behavioral Change Communication (SBCC)

Strategy 06 - Establishment of mechanism for sustainable implementation and monitoring of food safety policy.

Sub Strategies

6.1 Strengthen the existing institutional framework and mechanism for implementation of the Food Safety Policy.

6.2 Identify new innovative financial modalities that do not entail conflicts of interest to support policy implementation.

6.3 Strengthen monitoring and evaluation mechanisms for the implementation of food safety policy throughout the food chain.

6.2 Responsibility and authority

National Level

- The administrative authority for the food safety policy rests with the Director General of Health Services (DGHS), who serves as the Chief Food Authority (CFA).
- The current Food Control and Administrative Unit of the Ministry of Health to be expanded as the Food Safety Bureau (FSB) under the Ministry of Health.

Provincial Level

- Provincial level food safety monitoring and coordination committee, headed by the Provincial Directors of Health Services (PDHS) and composed of heads of the relevant sectors to be established with the responsibility of monitoring and coordinating policy implementation and preventing of food safety hazards arising from their administrative areas.

District Level.

- It is proposed that RDHS also to be appointed as Food Authority.
- Food authorities and authorized officers for selected primary food production sectors to be established at district level with the responsibility of preventing food safety hazards arising from their sectors. They will be monitored and supervised by the head of the department who will be a member of the FSC

Divisional / Ground Level

- Medical Officer of Health (MOH) and the Municipal Councils will be the Food Authorities at divisional level.
- Existing authorized officers under the Food Act will remain without any change.
- A mechanism to be developed to ensure that all authorized officers working under Municipal Councils to be legally responsible to the relevant MOH with regards to food safety of municipal council areas (to be further discussed).

6.3 Monitoring and Evaluation

The monitoring and evaluation of the food safety policy will be overseen by a high-level multi-sectoral committee and proposed FSB of the Ministry of Health in accordance with the targets and indicators outlined in the strategic framework.

7. GLOSSARY

Animal Feed: Food whether processed, semi-processed or raw, given to domestic animals, especially livestock, in the course of animal husbandry

Authorized Officer: Officer appointed under a Food Authority to implement the Food Act and its regulations by enforcing legal powers including inspection and prosecution.

Codex Alimentarius: Collection of standards, guidelines and codes of practice adopted by the Codex Alimentarius Commission.

Chief Food Authority: Person responsible to ensure the implementing of the Food Act and its regulation to ensure food safety in the entire country.

Contaminant: Any biological, or chemical agent, foreign matter, other substances, not intentionally added to food which may compromise food safety or suitability

Food Authority: Person responsible to ensure the implementing of the Food Act and its regulation to ensure food safety in in his administrative area.

Food: Any substance, whether processed, semi-processed or raw, which is intended for human consumption, and includes drink, chewing gum and any substance which has been used in the manufacture, preparation or treatment of "food" but does not include cosmetics or tobacco or substances used only as drugs.

Food Chain: The series of processes that involves set of people, Institutions, industries, infrastructure where food is grown or produced, sold, and eventually consumed.

Food control system: Collection of activities carried out by the government to ensure food safety throughout the food chain.

Food handler: any person who directly handles packaged or unpackaged food, food equipment and utensils or food contact surfaces and is therefore expected to comply with food hygiene requirements

Food hygiene: all conditions, measures, and practices necessary to ensure the safety and suitability of food at all stages of the food chain

Food premises: includes any shop, stall, or place where a food is sold or manufactured or stored for sale

Food safety: Food safety is defined as “the assurance that food will not cause harm to the consumer when it is prepared and/or eaten according to its intended use

Food surveillance: Continuous, systematic collection, analysis and interpretation of food safety information and timely sharing of such information with relevant stakeholders with the objective of risk assessment and taking control / preventive measures.

Food borne disease: Illnesses contracted from eating contaminated food or beverages. Illnesses include food borne intoxication and infections ranging from diarrhoea to cancers

Hazard: A biological, chemical, or physical agent in or condition of food with the potential to cause and adverse health effect

HACCP: A system which provides the framework for monitoring the total food system, from harvesting to consumption, to reduce the risk of food borne illness. The system is designed to identify and control potential problems before they occur.

Risk assessment: The scientific evaluation of known or potential adverse health effects resulting from human exposure to food borne hazards.

Risk assessment team: Scientific multidisciplinary team appointed by the CFA with the objective of food safety risk assessment and advise on risk management and communication.

Risk communication: refers to the interactive exchange of information and opinions throughout the risk analysis process concerning hazards and risks, risk-related factors and risk perceptions, among risk assessors, risk managers, consumers, industry, the academic community and other interested parties, including the explanation of risk assessment findings and the basis of risk management decisions.

Risk management: Involves both the identification of the standards of acceptable risk appropriate to different types of food hazards, and the establishment of procedures to ensure that the risks are kept within the limits set by those standards

Annexures

Annexure 1 - Strategies, Sub strategies and relevant agencies responsible for implementing the food safety policy under each strategy.

STRATEGIC FRAMEWORK

Strategy 1 **- Strengthen institutional framework and preventive food safety approaches in food production sectors**				
Sub Strategies	**Key actions**	**Expected outputs / outcomes for key actions**	**Monitoring indicators**	**Key Responsible Entities**
1.1 Strengthen existing institutional framework to support food control systems at all levels	1. Establish a central level institution (Food Safety Bureau) under the MoH	Food Safety Bureau established and functioned to strengthen institutional framework to support food control systems at all level	Availability of Food safety Bureau under the MoH	MoH, all relevant Ministries (DAPH, Agriculture, Export, Fisheries, Plantation etc.) and departments, Provincial ministries and departments, IDB, Food Industries and Food Associations (CCC, FPA),
	2. Formation of a Food Safety Monitoring and Coordinating Committee at the provincial level.	Provincial level food safety monitoring and coordinating committee created and available	1. Availability of food safety monitoring and coordinating committee at the provincial level 2. No of provincial coordinating committees available	
	3.Food Authorities at divisional level will be the Medical Officer of Health and Municipal Councils.	Food authorities as Medical Officer of Health and Municipal Councils at divisional level made available	Availability of food authorities as Medical Officer of Health and Municipal Councils at divisional level	
	4.A system to be developed that all authorized officers working under Municipal Councils also to be	Institutional framework was strengthened to support food control systems at all levels.	Availability of a system with all authorized officers working under Municipal Councils for the	

	legally responsible for the relevant MOH to ensure food safety of municipal council areas. *(Special note - Need to discuss in the presence of Chairman /Commissioner in the Municipal Council and about the Municipality Vet. Surgeons in Municipal Councils)*		relevant MOH to be legally responsible	
1.2 Strengthen preventive food safety approaches in primary food production sectors	1. Promote GAP (Good Agricultural Practices) and GAHP (Good Animal husbandry practices) in all primary food production sectors.	All primary food production sectors strengthened with GAP and GAHP	1. Number of primary food production sectors available with GAP **2.** Number of primary food production sectors available with GAHP	All primary food production sectors (MoA, DoA, MoF, DAPH, DFAR, MoP, CDA, SLTB), NARA, Police and National security forces, NFS
	2. Strength registering and mapping all commercial level farmers including primary milk processors, secondary milk processors, meat processors under the relevant Food Authorities and facilitate producer organization.	Commercial level farmers including secondary milk processes, meat processes registered and mapped under relevant food authorities	1. No:/Proportion of commercial level farmers including primary milk processors registered and mapped under each MOH 2. No:/Proportion of commercial level secondary milk processors registered and mapped under each MOH 3. No:/Proportion of commercial level meat	

			processors registered under each MOH	
	3. Regularize and monitor the importation, local manufacturing and distribution marketing of farming inputs. Eg; usage of pesticides, fertilizers and veterinary Biologicals. *(Special note by DAPH* - Registrar of veterinary drugs is carrying out and responsible for all these activities mentioned herewith)	Importation, distribution marketing and usage of pesticides, fertilizers and veterinary Biologicals regularized and monitored to ensure food safety	1. Availability of mechanism for regularization the importation of pesticides, fertilizers and veterinary biologicals 2. Availability of monitoring mechanism for distribution & marketing of pesticides, fertilizers and veterinary biologicals 3. Availability of monitoring mechanism of usage of pesticides, fertilizers and veterinary biologicals	
	4. Develop / Strengthen mechanisms to ensure safety of animal feed by the relevant food authorities	Mechanisms to ensure safety of Animal Feed by the relevant food authorities improved	Availability of mechanism to ensure safety of animal feed by the relevant food authorities	
	5.Develop / Strengthen mechanisms to	Infrastructure developed/improved	1. Availability of mechanism to ensure safety of	

	ensure safety of livestock by the relevant food authorities	at livestock to ensure food safety	livestock by the relevant food authorities 2. Proportion of financial allocation available to develop infrastructure facilities at livestock to ensure food safety	
	6.Develop / Strengthen mechanisms to ensure safety of fish and fish products by the relevant food authorities	Infrastructure developed/improved at Fisheries department to ensure food safety	1. Availability of mechanism to ensure safety of fish and fish products by the relevant food authorities 2. Proportion of financial allocation available to develop infrastructure facilities at Fisheries department to ensure food safety	
	7.Develop a periodical reporting system data base) in primary food production sectors	Reporting system established in primary food production sectors	Availability of a reporting system from primary food production sectors to generate the data	
1.3 Strengthen preventive food safety approaches in industrial food	1. Ensure Good Manufacturing Practices (GMP) and Good Hygienic Practices (GHP) in all	Food safety approaches improved by industrial food production sectors	Proportion of ensured GMP and GHP of food manufacturing industries out of all food	All industrial food production sectors

production sectors	food manufacturing industries.	ensuring GMP and GHP	manufacturing industries	
	2. Strength registering of food premises including commercial cottage kitchens, as a priority at the relevant Food Authority.	Food premises registration improved including commercial cottage kitchens	Proportion of registered food premises including commercial cottage kitchens in each MOH/RDHS	
	3. All food handlers employed in food industries to be registered under the relevant Medical Officer of Health, following a formal food safety training.	Registration of all food handlers in food industries completed under MOH with a formal food safety training	1. No of training conducted for food handlers under relevant MOH **2.** Proportion of registered food handlers employed in food industries under the relevant Medical Officer of Health following a formal food safety training	
	4. Establish a new technology and mechanism to prevent potential food safety hazards specially in high-risk food commodities.	New technology and mechanism developed and implemented to prevent potential food safety hazards in high-risk commodities	Availability of a new technology and a mechanism to prevent potential food safety hazards in high-risk food commodities	

	5. Periodical surveillance system of food safety hazards at local level and reporting system to focal point	Reporting system developed at local level to report food safety hazards	1. Availability of a reporting system at MOH level to report food safety hazards 2.No of reports received quarterly on food safety hazards by each RDHS	FCAU, RDHS
	6. Food industries to conduct periodical surveillance of potential food safety hazards and report them to proposed Food Safety Council.	6. Periodical surveillance of potential food safety hazards conducted by food industries and report them to proposed Food Safety Council.	1. Number of surveillance conducted quarterly/ annually for potential food safety hazards by food industries 2. Number of reports received quarterly/annually by Food Safety Council	Food industries

Strategy 2 - Ensure the safety of domestic, import, export food while assuring food security				
Sub Strategies	**Key actions**	**Expected outputs / outcomes for key actions**	**Monitoring indicators**	**Key Responsible Entities**
2.1 Strengthen mechanisms to ensure domestic food safety	1. Strengthen mechanisms to ensure food safety at manufacturing level, during transportation, and storage.	Transportation and storage of food at domestic level improved to ensure food safety	1. Availability of an appropriate mechanism to ensure food safety during transportation and storage 2. Proportion of financial allocation available to develop infrastructure facilities to ensure food safety during transportation 3. Proportion of financial allocation available to develop infrastructure facilities to ensure food safety for storage	MoH, CAA, MoI, NFS, all relevant Ministries and departments, Provincial ministries and departments, IDB, Food Industries and Food Associations (CCC, FPA)
	2. Strengthen mechanisms to ensure food safety at Wet Markets and Slaughterhouses	Improved food safety at Wet Markets and Slaughterhouses while assuring food security	1. Availability of an appropriate mechanism to ensure food safety at Wet Markets and Slaughterhouses 2. No of wet markets available ensuring food safety 3. No of slaughter houses available	

			ensuring food safety	
	3. Strengthen food inspection, enforcement and food recalls.	Food inspection, enforcement and food recalls improved to ensure domestic food safety	1. Proportion of completed food premises inspections out of planned 2. No: of enforcement and food recalls carried out by each MOH	
	4. Strengthen mechanisms to ensure street food safety.	Street food safety improved under hygiene regulation	1. Availability of a mechanism/ guideline to ensure street food safety under hygiene regulation 2. No of street food outlets inspected annually by each MOH	
	5. Strengthen mechanisms to ensure safe food for vulnerable / special groups	Mechanism to ensure safe food for vulnerable/special groups improved	Availability of a mechanism to ensure safe food for vulnerable/ special groups	
2.2 Ensure imported foods to comply with country food safety requirements	1. Conduct a need assessment and strengthen the ASYCUDA system.	Food safety for imported foods improved with ASYCUDA system after need assessment	1. Need assessment conducted to ensure imported foods to comply with country food safety requirement 2. ASYCUDA system strengthened following a need assessment	SL Customs and Border control agencies, (MoH, SLSI, DoA, DAPH) Police, MoI, Food importers, IDB, Food Industries and Food Association
	2. Registration of all food importers	1.Availability of a mechanism to	No: food importers registered under	

	under chief food authority.	register food importers 2.Registration of all food importers completed	chief food authority	s (CCC, FPA)
	3. Implement pre-import certification requirement for selected/high-risk food categories identified based on food surveillance.	pre-import certification requirement for selected/high-risk food categories identified based on food surveillance implemented	Availability of pre import certification requirement for selected/high risk food categories identified based on food surveillance	
	4. Develop a traceability mechanism for food items released from Customs.	Traceability mechanism made available and implemented for food released from Customs	Traceability mechanism for food items released from customs developed	
	5. Strengthen and streamline the food safety / sample testing mechanism at the border.	Food safety testing mechanism improved at boarder level for food safety requirement in the country	Appropriate food safety/sample testing mechanism at the boarder incorporated	
	6. Importers and relevant food industries to take responsibility for tracing food (ingredients) imported for industrial	Responsibility taken by importers and relevant food industries for tracing of food (ingredients) imported for industrial	1. No of importers carried out to tracing food (ingredients) imported for industrial purposes, after being released from Customs. 2. No of industries carried out to	

	purposes, after being released from Customs.	purposes after being released from customs	tracing food (ingredients) imported for industrial purposes, after being released from Customs.	
	7. Strengthen mechanisms to prevent mixing of rejected food at the border with human food.	Mechanisms improved to prevent mixing rejected food at border with human food for food safety requirement in the country	1. Availability of mechanisms to establish to prevent mixing of rejected food at the border with human food	
	8. Introduce new mechanisms to prevent importation of food items not align with local food regulations.	Mechanism introduced and implemented to prevent importation of food items not align with local food regulations	1.Availability of a mechanisms to establish to prevent importation of food items which was not align with local food regulations 2.Proportion of food items found which not aligned with local food regulations	
2.3 Strengthen mechanisms to promote exportation of safe food	1. Establish a mechanism to monitor the safety of exported foods as per requirements of the destination country.	Mechanism to monitor the safety of exported foods as per requirements of the destination country established	Availability of a mechanism to monitor the safety of exported foods as per requirements of the destination	EDB, MoH, Food certification bodies including SLSI, SLAB, food exporters,

	2. Strengthen interaction between national agencies facilitating international fair-trading practices	Appropriate interaction between national agencies facilitating international fair-trading practices improved	No of national agencies facilitating international fair-trading practices	DoEA, SLTB, MoI, Food Exporters, IDB, Food Industries and Food Associations (CCC, FPA), NPQS, DFAR
	3. Development of a system to promote exporting GAP / GAHP or organic certified food products with the view of exporting only such products in future.	A system to promote exporting GAP /GAHP or organic certified food products	Availability of a system to promote exporting GAP /GAHP or organic certified food products	
	4. International food alerts to be investigated promptly with the view of taking corrective action to promote food exports.	International food alerts investigated promptly with the view of corrective action to promote food export	Number/proportion of international food alerts investigated to take corrective action to promote food experts	
2.4 Assure food security, environmental safety and address the climate change issues	1. Reduce the food waste resulting from climate anomalies.	Mechanism established to reduce food waste resulting from climate anomalies	Availability of a system to reduce the food waste resulting from climate anomalies	MoH, MoE, MoI, Other relevant Ministries, Primary Food Production sectors, Food
	2. Introduce intervention to reduce food	Interventions introduced and made available to	No of interventions carried out to	

	losses along the food chain due to poor storage and transport practices.	reduce food losses along the food chain due to poor storage and transport practices.	reduce food loses along the food chain due to poor storage and transport practices	Industries and Food Associations (CCC, FPA), Research Institutes and Academia, UN Agencies.
	3. Encourage re-distribution of food that is safe for human consumption.	Re distribution of food that is safe is assured	Availability of redistribution method for food that is safe for human consumption	
	4. Develop measures to stop use of materials such as non-recyclable polyethene for food packaging while introducing environmentally friendly options.	Environmentally friendly food packaging materials developed and made available	1.Availability of environmentally friendly food packaging materials 2.Availability of legislation to stop the usage of non-recyclable polythene	

Strategy 03 – Strengthen Food safety legislation, standards, guidelines, codes of practices, and standard operating procedures				
Sub Strategies	**Key actions**	**Expected outputs / outcomes for key actions**	**Monitoring indicators**	**Key Responsible Entities**
3.1 Develop, update food legislations and align other enactments related to food with the Food Act.	1.Conduct a comprehensive gap analysis of existing food safety legislations and policy instruments by identifying	1. Advocacy meeting conducted with relevant stakeholders 2. Gap analysis conducted on	1. Availability of amended and reviewed Food act or new Food act 2. No of updated food	MoH, MoF, MOF, AG's Dept., Legal Draftsman, Ministry of Justice, legal

	relevant stakeholders 2.Amend the Food Act and review periodically or as required to support the implementation of food safety policy. 3. Develop/formulate and disseminate food safety standards, guidelines, SOPs, for specific sectors according to the requirement	existing food act and regulations 3. Food act amended and reviewed periodically and made available to improve food safety standards in the country	legislations available to support the implementation of food safety policy out of planned	draftsman, other relevant Ministries and departments, food research institutes and Academia, CDA, IDB, Food Industries and Food Associations (CCC, FPA)
	4.Review and revise existing regulations under the Food Act periodically, based on risk assessment, scientific evidence and country requirements.	Existing regulations reviewed and revised periodically based on risk assessment, scientific evidence and country requirements according to risk assessment, scientific evidence and country requirement and made available	1. No of regulation meetings conducted to review and revise existing regulations under the food Act out of planned 2. No of food regulations revised under the food act 3. No of new food regulations available	

	5. Develop new regulations under the Food Act based on priority areas, risk assessment, scientific evidence and country requirements.	New regulations developed and enforced under food act with risk assessment, scientific evidence and country requirement	1. Number of new regulations were developed under the Food Act based on priority areas, risk assessment, scientific evidence and country requirements 2. No of new regulations implemented	
	6.Control unethical marketing through a robust legislative mechanism.	1. Mechanism to control unethical marketing through a robust legislative mechanism developed and made available	1.Availability of a mechanism to control unethical marketing through a robust legislative mechanism 2. No of legislative actions carried out for unethical marketing	
	7.Develop / amend food regulations under the Food Act to support adoption of GAP, GAHP HACCP, GHP and GMP principles.	Food regulations under the Food Act to support adoption of GAP, GAHP HACCP, GHP and GMP principles	No: of Food regulations developed/ amended under the Food act to support adoption of GAP, GAHP,	

		developed and made available	HACCP, GHP and GMP principles	
	8.Harmonizing all food related regulations with Food Act regulations or update Food Act regulations to protect public health.	All food related regulations harmonized with food act or updated food act regulations to protect public health	1 No: of food related regulations harmonized with food act regulations 2.No of food regulations implemented to protect public health	
	9.Harmonize national regulations with international food safety framework	National regulations are harmonized with international standards	No of regulations harmonized with international standards	MoH
3.2 Develop and update food standards, guidelines, codes of practices, SOPs and food ethics.	1. Develop and implement fit-for-purpose food safety standards and guidelines.	Fit for purpose food safety standards and guidelines implemented	1.Fit for purpose food safety standards and guidelines developed 2. Proportion of food safety standards and guidelines developed 3. Proportion of food safety standards and guidelines implemented out of developed guidelines	MoH, SLSI, CAA, MoI, other relevant Ministries and departments, HARTI, Food Research Institutes and Academia, CDA, IDB, Food Industries and Food Associations (CCC, FPA)

			4. No of SOPs developed	
	2. Local certification standards (such as GAP, GAHP, GMP, HACCP) to be harmonized with international standards.	Local certification standards harmonized with international standards to strengthen food safety	Percentage of local certification standards harmonized with international standards out of planned	
	3. Develop codes of practices, Standard Operating Practices (SOPs) and Food Safety Ethics.	Codes of practices, SOPs and Food Safety Ethics made available to strengthen food safety	1. No of Codes of practices developed 2. No of SOPs developed 3. No of Food Safety Ethics developed	
	4. Sri Lanka Standard Institution (SLSI) to work and coordinate with other stakeholders including MoH, MoA, MoF in the process of developing food standards.	SLSI coordinated with other stakeholders in the process of developing standards	1. Availability of food standards developed by SLSI by coordinating with other stakeholder 2. Number of meetings conducted by SLSI to work and coordinate with stakeholders to develop food standards out of planned	
	5. Ensure that national food safety systems are aligned with the standards of the Codex Alimentarius Commission to	National food safety system aligned with standards of Codex	No of food regulations in National food safety system align with standards of	

	protect public health and facilitate fare trade for safe and healthier food options.	Alimentarius commission	Codex Alimentarius commission	
3.3 Strengthen monitoring and implementation of food legislations.	1. Establish the mechanism (as specified under sub strategy 1.1) to monitor and evaluate the implementation of food safety policy.	• Establishment of FSC • Establishment of FSB	1.FSC established 2.FSB established	Sri Lanka Customs, MoH, CAA, MoI, other relevant Ministries and departments, Food Industries and Food Associations (CCC, FPA), Provincial ministries and departments, CDA, IDB, Food Industries and Food Associations (CCC, FPA)
	2. Strengthen monitoring and implementation of Animal Feed Act and other relevant Acts.	Monitoring and implementation of Animal Feed act and other relevant acts improved	1.Animal feed act monitored and implemented 2.No of reviews conducted to ensure animal feed	

Strategy 04 – Strengthen food safety surveillance, risk analysis and respond to food safety emergencies and challenges				
Sub Strategies	**Key actions**	**Expected outputs / outcomes for key actions**	**Monitoring indicators**	**Key Responsible Entities**
4.5 Establish a centrally coordinated food safety surveillance and information system.	1. Establish a centrally coordinated food safety surveillance & information system under the Ministry of Health	Food safety surveillance system established and made available at central level	Availability of centrally coordinated food safety surveillance system	MoH, All Ministries and departments, all stakeholders throughout the food chain, CDA, IDB, Food Industries and Food Associations (CCC, FPA), Research Institutes and Academia, Public and Private Food Laboratories, DAPH, Agriculture,
	2. Develop integrating food safety surveillance systems of relevant sectors in coordination with existing food-borne disease surveillance system of the Ministry of Health for real-time data sharing among relevant stakeholders. 3. Develop integrated surveillance of chemicals (antibiotic residues, heavy	Integrated surveillance system developed	Availability of an integrated food safety surveillance system	

	metals, pesticides, mycotoxins etc)			
	4. Strengthen / Establish food safety hazard surveillance within each primary food production sectors and all other key sectors including food industries to identify sector specific food safety hazards.	Food safety hazard surveillance developed and improved to identify sector specific food hazards	Availability of Food safety hazard surveillance systems in food production sectors/ food industries	
	5. Expand the integrated AMR surveillance of food borne pathogens in collaboration with other relevant sectors.	Integrated AMR surveillance of food borne pathogens integrated and expanded with other relevant sectors	AMR surveillance system integrated and expanded with relevant sectors	
4.6 Strengthen analytical capacity of food laboratory system & laboratory network	1. Develop and upgrade laboratory infrastructure nationally & regionally to meet the sophisticated food safety demands and establish well equipped accredited laboratories to	Accredited food safety laboratory developed at national level	Availability of Accredited food safety laboratory to generate laboratory data	MoH, All relevant Ministries and departments, Public and Private Food Laboratories, Research Institutes, relevant professional

	generate laboratory data			bodies, CDA, IDB, Food Industries and Food Associations (CCC, FPA),
	2. Support on obtaining accreditation status for food laboratories at regional level	Upgraded food safety laboratories at regional level	No of regional food laboratories upgraded	
	3. The National Food Laboratory Management System should be established with the view of registering and mapping of food testing laboratories.	National Food Laboratory Management System established and registered and mapped food testing laboratories	1. Availability of a National Food laboratory management system 2. No of food testing laboratories mapped and registered under National laboratory Management system	
	4. Proficiency Testing services should be expanded and existing PT services in the country should be utilized to a maximum.	Proficiency testing services expanded to improve analytical capacity of food laboratory system	1. Availability of proficiency testing services in all districts 2. No of proficiency testing services available in the country	
	5. Develop on site laboratory screening test capacity at identified sites / centres.	On site laboratory screening test capacity at identified centers developed and implemented	Number of onsite Laboratory screening test sites/centers available	
4.7Establish a formal risk	1.Develop a mechanism for supply chain	Supply chain management	Availability of supply chain	MoH

assessment, management and communication system	management of laboratory testing commodities	for food laboratories developed	management for food laboratories	
	2.Support on obtaining accreditation status of food laboratories	Accreditation of food laboratories obtained	No of food laboratories accredited	MoH
	3.Establish scientific risk assessment unit with multi-disciplinary team to conduct risk analysis, provide advice and guidance on food safety risk management and risk communication.	Scientific risk assessment unit with multi-disciplinary team was established	Scientific risk assessment unit established and available	MoH, relevant Ministries and departments, Research Institutes, Academia, Professional bodies and associations.
	4.Conduct relevant surveys to support and facilitate risk analysis and assessment.	Surveys conducted for risk analysis and assessments	Number of surveys conducted to support and facilitate risk analysis and assessment out of planned	
	5.Capacity building on hazard identification, exposure assessment and risk characterization	Capacity building programmes on hazard identification, exposure assessment and risk characterization conducted	No of Capacity building programmes on hazard identification, exposure assessment and risk characterization done out of planned	MoH & other sectors
	6.Implementation of food safety risk	Food safety risk assessment	Availability of a mechanism to implementation	MoH and other sectors

	assessment in all sectors	in all sectors implemented	of food safety risk assessment in relevant sectors	
	7.Establishment of risk management & communication mechanism	Risk management & communication mechanism established	Availability of risk management & communication mechanism	MoH
4.8Improve responding mechanisms for food safety emergencies and challenges resulting from local and global changes.	1. Establish/ develop a national food safety emergency response plan and rapid food safety alert system among relevant agencies to exchange information on local and global emergencies.	National food safety plan and food safety alert system established and implemented to improve responding mechanism for local and global changes	1. Availability of National food safety emergency response plan 2. Availability of rapid food safety alert system	MoH, Other relevant Ministries and departments (MoH, MoA, DAPH, etc), Research institutions, Public and Private Laboratories, Academia, NTFC
	2. Strengthen the response to food safety emergencies & challenges	Response to food safety emergencies & challenges strengthened by developing an action plan	Availability of an action plan to strengthen the response to food safety emergencies & challenges	
	3. Adopt risk management options to address emerging food borne risks	Risk management option to address emerging food borne diseases adopted and made available	Availability of a Risk management option to address emerging food borne diseases	
	4. Develop a mechanism to	Mechanism to anticipate and	Availability of a mechanism to	

	anticipate and mitigate food safety incidents, natural disasters and other food safety crises	mitigate food safety incidents, natural disasters and other crisis developed and implemented	anticipate and mitigate food safety incidents, natural disasters and other food safety crises	
	5. Identify and evaluate food safety impacts arising from global changes and food systems transformation	Mechanism on food safety impacts arising global changes and food systems transformation identified and evaluated	1. No of meetings conducted to identify food safety impacts arising from global changes and food systems transformation 2. Availability of a mechanism to evaluate food safety impacts arising from global changes and food systems transformation	
	6. Conduct regular simulation exercise for food safety emergency response collaborating with others sectors	Regular simulation exercises conducted for food safety emergency responses	No of simulation exercises conducted for food safety emergency responses with other sectors	MoH
	7. Management of food safety emergencies through Rapid Response Team (RRT)	RRT managed food safety emergencies	Availability of RRT team to manage food safety emergencies	RRT

	8. Post event review & update food safety emergency response plan	Post event review done and updated on food safety emergency response plan	Availability of review reports on food safety emergency response plan	MoH

Strategy 05 - Capacity development of stakeholders through-out the food chain, risk communication, research and development on healthy and safe food.				
Sub Strategies	**Key actions**	**Expected outputs / outcomes for key actions**	**Monitoring indicators**	**Key Responsible Entities**
5.6 Enhance the capacity of stakeholders along the food chain	1. Mapping target groups and develop ToT programs, standard training programmes for all target groups throughout the food chain.	Capacity building developed among stakeholders along the food chain for healthy and safe food in the country	1. Target groups mapped throughout food chain for standard training programmes 2. No: of TOT programmes conducted for target groups out of planned	MoH, relevant Ministries and departments, EDB, CDA, SLSI, Training institutions, Academia, relevant professional bodies / colleges, UN organizations, Food Industries and Food Associations (CCC, FPA), Research Institutes and Academia,
	2. Focus capacity building of relevant	Capacity building developed for relevant officers	1. No: of capacity building programmes conducted for	

	officers on specific areas; foodborne disease surveillance, Risk analysis, food safety emergency response, laboratory food testing, technology development in relevant areas etc.	on specific areas on food safety	primary producers on GAP, GAHP targeting agriculture, fisheries, ROP& animal husbandry 2. No of capacity building programmes conducted for manufacturers & food processors on regulations, GHP food safety related certifications 3. No of capacity building programmes conducted on relevant regulations for transporters and storage workers	
	3. Capacity building of farmers and consumers with the view of creating a demand for GAP and GAHP	Capacity building developed among farmers and consumers for availability and to consume safe and healthy food	1. No: of capacity building programmes conducted for farmers for GAP and GAHP to produce certified products in the market	

	certified food products and advocate / promote relevant authorities to make such GAP and GAHP certified products available in the market.		out of planned 2. No: of capacity building programmes conducted for consumers to buy GAP and GAHP certified products from the market 3. Proportion of products available with GAP and GAHP in the market 4. Develop a knowledge hub on FCAU website	
	4. Establish a publicly accessible knowledge hub for consumers on website	Database/knowledge hub on food safety implemented for public with readymade certificate	Availability of publicly accessible knowledge hub/database on food with readymade certificate	
	5. Capacity development of authorized officers on regulations, risk assessment and	Capacity development programmes conducted for authorized officers	No of capacity development programmes conducted for authorized officers	MoH

	laboratory services			
	6. Capacity development of legal officers on food act and regulations	Capacity development conducted for legal officers	No of capacity building programmes conducted for legal officers	MOH
5.7 Strengthen risk communication system and public awareness on healthy and safe food.	1.Advocacy targeting all stakeholders of the food chain with special emphasis on senior-level politicians and administrators on food safety.	Risk communication system improved by advocacy for provision of healthy and safe food in the country	No: of advocacy meetings conducted to stakeholders of food chain targeting senior level politicians and administrators on food safety out of planned	MoH, relevant Ministries and departments, Training institutions, Academia, relevant professional bodies / colleges, UN organizations, ICTA, SL Customs, National Trade Facilitation Committee/Secretariat
	2.Facilitate interactive communication with the view of empowering community and accommodating and investigating public complaints with timely feedback.	Interactive communication facilitated and improved to accommodate and investigate public complaints with timely feedback	1. No: of public complaints investigated with timely feedback 2. No: of programmes conducted for community empowerment on healthy and safe food	
	3.Develop IEC materials for public	IEC materials developed with	No of IEC materials	

	awareness and risk communication with the support of Health Promotion Bureau (HPB) of the MoH	the support of HPB	developed with the support of HPB for public awareness and risk communication	
	4.Map the priority areas on food safety and strengthen public awareness program to promote food safety knowledge and literacy among general public, in collaboration with other stakeholder agencies.	Priority areas on food safety mapped and improved to promote food safety knowledge and literacy among general public	1. No; of meetings conducted with stakeholder agencies for mapping priority areas on food safety to promote food safety knowledge and literacy among general public out of planned 2. No of public awareness programmes conducted on food safety out of planned	
	5.Develop protocols on risk communication	Protocol developed on risk communication	Availability of protocol on risk communication	
5.8Promote research and	1. All key institutions	Research conducted on food	No of research	MoH, relevant Ministries and

development on food safety and integrate findings into policy and practice.	to conduct the research as identified by the mapping and based on food safety service needs.	safety to facilitate policy decisions and practices in the country	conducted on food safety by key institutions out of planned	departments, Academia, relevant professional bodies / colleges, UN organizations, CDA. IDB, RRI, CRI, Food Industries and Food Associations (CCC, FPA), Research Institutes and Academia
	2. Develop framework for partnerships with scientific community including academia and food research institutes to facilitate risk assessment.	Framework developed for partnerships with scientific community to facilitate risk assessment	Availability of a framework for partnerships with scientific community including academia and food research institutes to facilitate risk assessment.	
	3. Collaborate and conduct research with local and international partners for identified research needs related to	Research conducted on food safety to make policy decisions to improve healthy and safe food to the nation	1. No of research conducted with local partners for identified research needs related to food safety 2. No of research conducted with international	

	food safety.		partners for identified research needs related to food safety	
	4. Develop a research network with relevant government institutions, private institutions, international organization & academia	Research network developed with relevant stakeholders	Availability of research network	relevant government institutions, private institutions, international organization & academia
	5. Identify funding source for research & development activities	Research and development activities conducted	Availability of funding source for research & development activities	MoH

Strategy 06 - Establishment of mechanism for sustainable implementation and monitoring of food safety policy				
Sub Strategies	**Key actions**	**Expected outputs / outcomes for key actions**	**Monitoring indicators**	**Key Responsible Entities**
1.Expand and empower the existing institutional mechanism for implementation of the Food Safety Policy.	1. Incorporate proposed governance mechanisms to existing governance / institutional mechanism to strengthen implementation , monitoring and coordination of national food safety policy	Food safety policy implemented by expanding and empowering existing institutional mechanism	**1.** Proposed governance mechanism incorporated to existing governance / institutional mechanism **2.** Availability of organizational framework to strengthen implementation, monitoring and coordination of national food safety policy	MoH, MoF, MoI, Ministry of Justice, Prison Affairs and Constitutiona l Reforms, other relevant Ministries and departments, Provincial ministries and departments, SL Customs, SLSI, NPQS, DFAR, Min. of Tourism *(for the food*
	2. Introduce a technical audit system to assess food safety governance mechanisms and compliance	Technical audit system implemented to assess food safety governance mechanisms	Availability of technical audit system to assess food safety governance mechanisms and	

	with food regulations.	and to compliance with food regulations	compliance with food regulations	*safety in hotel industry)* IDB, Food Industries and Food Associations (CCC, FPA)
	3. Promote generation of scientific evidence and the use of risk assessment when establishing and reviewing food control measures.	Food control measures reviewed and established to promote generation of scientific evidence	No of food control measures established and reviewed to promote generation of scientific evidence and use of risk assessment	
	4. Advocate all stakeholders of the food chain to optimally implement and monitor the food safety policy	Food safety policy implemented and monitored by advocating all stakeholders	1. No of advocacy programmes conducted for implementation of food safety policy 2. Proportion of sectors/stakeholders implemented and monitored food safety policy throughout the food chain out of identified sectors/stakeholders	
	5. Identify food safety as a national priority and ensure adequate resources for successful policy implementation.	Food safety policy implemented successfully as a national priority	1. No: of activities carried out to implement food safety policy by each sector/ stakeholder **2.** Percentage of sectors/stakeholders identified food safety policy as national priority out of **i**dentified stakeholders **3.** Proportion of activities carried	

			out to implement food safety policy out of all activities under one strategy	
2.Identify new innovative financial modalities to support policy implementation .	1. Identify the modalities of financial incomes related to food safety policy and make a system to utilize that income for implementation of food safety policy	A system to identify appropriate modalities of financial incomes in relation to food safety policy identified and implemented	1. Availability of a system to identify appropriate modalities of financial incomes in relation to food safety policy **2.** Availability of a system to utilize those incomes to implement food safety policy	MoH, MoF, M/ Tourism, MoI, WHO, WTO, Donor agencies - WB, USAID, EU, ADB, IDB, Food Industries and Food Associations (CCC, FPA)
	2. Establish separate budget lines for each ministry and across all levels of public and private organizations to implement food safety policy.	Separate budget lines for each ministry and across all levels of public and private organizations to implement food safety policy established	1. Availability of separate budget lines for each ministry and across all levels of public and private organizations to implement food safety policy. 2. No of Ministries identified with separate budget lines in the government to implement food safety policy 3. No of private organizations identified with separate budget lines to implement food safety policy	
3.Strengthen monitoring and evaluation mechanisms for the implementation of food safety policy	1.Establish central and peripheral level systems to monitor the implementation of food safety Policy trough all responsible sectors,	Central and peripheral level systems to monitor the implementatio n of food	1. Availability of a system to monitor the implementation of food safety policy through responsible sectors with collaborative efforts and clearly	MoH, MoF, relevant Ministries and Departments, Academia, relevant

throughout the food chain.	with collaborative efforts and clearly defined roles.	safety policy established	defined roles established at central level 2. Availability of a system to monitor the implementation of food safety policy through responsible sectors with collaborative efforts and clearly defined roles established at peripheral level 3. No of supervisions carried out to monitor implementation of food safety policy at district level	professional bodies / colleges, UN bodies and Trade Chambers
	2.Develop inbuilt systems to monitor and evaluate implementation of food safety policy (as specified under substrate 1.1).	Inbuilt system for Monitoring and evaluation of food safety policy implemented	Availability of an inbuilt systems to monitor and evaluate implementation of food safety policy	
	3.Conduct regular reviews and update at national and district level to assess the implementation of food safety policy	Reviews conducted at national and district level to assess the implementation of food safety policy	1.No of reviews conducted at national to assess the implementation of food safety policy 2. No of Reviews conducted at district level to assess the implementation of food safety policy	

Annexure 11

List of existing policies relevant to the Food Safety Policy

- National Nutrition Policy
- National Policy on Maternal Child Health
- National Policy on Biosafety
- The National Fisheries & Aquaculture Policy
- Draft National Agricultural Policy
- Draft National Dairy policy

Annexure 111:

List of Contributors:

No	Name	Unit
01	Mr. MG Ajith Pushpakumara	Director – Agri Business – Ministry of Agriculture
02	Dr. Jeewani Marasinghe	Registrar of Pesticides - Department of Agriculture
03	Ms. Renuka De Silva	Horticulture Crops Research and Development Institute Department of Agriculture
04	Mr. A.S.M. Roshan	Agriculture Enterprises Development and Information Service - Department of Agriculture
05	Ms. Champika Hewaga	National Plant Quarantine Service - Department of Agriculture
06	Ms Champa Magamage	Department of Agriculture - Department of Agriculture
07	Dr. K.M.H.G. Sarath Priyantha	Chief Livestock Economist – Department of Animal product and Health
08	Dr. Chamari Palliyaguru	Principal Scientist/Veterinary– Department of Animal product and Health
09	Dr. Kamalika Ubeyrathna	Veterinary Investigation Specialist– Department of Animal product and Health
10	Dr. M.A.Roshan Priyantha	Principal Scientist / Bacteriology & Pathology– Department of Animal product and Health
11	Ms. Sepalika Wickramasinghe	Director Quality Control – Department of Fisheries
12	Ms. J.P.I Swaranalatha	Deputy Director Ocean Resource – Department of Fisheries
13	Mrs. A.J. Warusawitharana	Director Agriculture unit – Ministry of Plantation
14	Mrs Prasadee Ubayasiri	Deputy Director Rubber and Coconut Development– Ministry of Plantation
15	Mrs. O.P.Weerasekara	Assistant Director Processing Division – Coconut Development Authority
16	Mrs.Nalani Balasubramaniam	Director (Sector iii) - Ministry of Industries
17	Mrs. H.M.A.Sachini Malika	Assistant Director- Ministry of Industries
18	Mr. K. H. Jayaratne	Industrial Development - Ministry of Industries
19	Ms. TD Kumaradasa	Senior Assistant Secretary – Ministry of Trade
20	Ms. KKIS Hewapathirana	Deputy Director – Planning – Ministry of Trade
21	MS. Gilma Dhanayake	Additional Secretary – Ministry of Trade
22	Mr. Kumudu Meegahage	Director – Ministry of Trade
23	Ms. Gayani Wijethilake	Assistant Director Export Agriculture – Export Development Board
24	Mr. Janak Badugama	Director Export Agriculture – Export Development Board
25	Ms. Suganthi Pathmanadan	Sri Lanka Custom
26	Mr. MDPM Perera	Sri Lanka Custom
27	Mr. Suresh Jayalath	Sri Lanka Custom
28	Mr. Asheem Mohomad	Sri Lanka Custom
29	Ms Udakara	National Institute of Health Services
30	Dr Ananda Jayalal	DDG EOHFS – Ministry of Health
31	RMWK Rathnayaka	LO – Legal Unit – Ministry of Health
32	Dr. VTSK Siriwardana	Ex/Director EOHFS – Ministry of Health
33	Dr Chandanee Withana	Director EOHFS – Ministry of Health
34	Dr. Vindya Kumarapeli	Director Policy & Planning Unit – Ministry of Health
35	Dr Suranga Dolamulla	Director Lab – Ministry of Health
36	Dr Bhanuja Wijethilaka	CCP EOHFS – Ministry of Health

37	Dr Buddhika Sudasinghe	CCP EOHFS – Ministry of Health
38	Dr Hemali Jayasekera	CCP EOHFS – Ministry of Health
39	Dr. Gayan Ariyadasa	CCP EOHFS – Ministry of Health
40	Dr. Mahesh Kumbukage	CCO EOHFS – Ministry of Health
41	Dr Hiranya Jayawickrama	CCP FHB – Ministry of Health
42	Dr Ayesha Lokubalasooriya	CCP FHB – Ministry of Health
43	Dr Supun Wijesingha	CCP HPB – Ministry of Health
44	Dr Amanthi Bandusena	CCP HPB – Ministry of Health
45	Dr Sachinthana Dilhani	CCP Nutrition – Ministry of Health
46	Dr Thushani Dabarera	CCP Epid unit – Ministry of Health
47	Dr Charith Hettiarachchi	RDHS Kalutara
48	Dr Udari Mambulage	RDHS Rathnapura
49	Dr Sujatha Pathirage	Consultant Microbiologist MRI
50	Dr Sherin Balasingham	CCP NCD – Ministry of Health
51	Dr Prasadi	MO Policy Development and Analysis – Ministry of Health
52	Dr TN Yapa	MO Policy Development and Analysis – Ministry of Health
53	Dr Hiranthika Hearth	MO EOHFS – Ministry of Health
54	Dr Charuhasini	MO EOHFS – Ministry of Health
55	Dr Kavindya Karunarathna	MO EOHFS – Ministry of Health
56	Dr Indika	MOH Dehiwala
57	Dr Ellawala	MOH Battaramulla
58	Mr. PDN Premarathna	AD EOHFS – Ministry of Health
59	Mr CS Gurusinghe	FDI EOHFS – Ministry of Health
60	Mr Jagath Bandara	FDI EOHFS – Ministry of Health
61	Mr SD Wijeweera	FDI EOHFS – Ministry of Health
62	Mr S Sutharshan	FDI EOHFS – Ministry of Health
63	Mr Bandara	FDI RDHS Gampaha
64	Mr Sangi Gunasekara	SPHID RDHS Matale
65	Mr Samarajeewa	FDI Badulla
66	Mr Pinidiya	Pricipal PHI – Ministry of Health
67	Mr. Kosala Mendis	DO EOHFS – Ministry of Health
