This document provides automated AI decision support, feasibility analysis, and personalized growth recommendations powered by SME360 AI engine.

1. Executive Summary & Feasibility Snapshot

FreshMart Grocery is an established enterprise operating within the Grocery / Mini-Mart sector, located in Colombo, Western Province, Sri Lanka. Operating under a Direct Retail / Service business model, the enterprise aims to execute strategic growth and operational refinement. Based on the operational details provided: The main objective of this expansion is to increase sales, extend the business's geographical coverage, strengthen its market presence, and establish a foundation for future growth. The new branch will operate under the existing FreshMart Grocery brand and follow similar service standards, product-quality requirements, and pricing strategies as the original store. The owner also intends to improve customer convenience by offering a wider selection of essential products, maintaining reliable stock availability, and introducing WhatsApp-based ordering and local delivery services where practical.

Predicted Feasibility	Model Confidence	Available Capital	Target Customers

4. Key Business Factors

Top Positive Supporting Factors (+):

- Customer Demand Score (1-100) (54 / 100)
- Available Capital (Lkr) (LKR 2,500,000)
- Expected Product Price (Lkr) (LKR 300)

Areas Needing Strategic Attention (-):

- Business Stage (Existing Business)
- Available Equipment Score (1-5) (3 / 5)
- Requested Loan Amount (Lkr) (LKR 1,000,000)

5. Strategy Priorities & Options Comparison

Top Recommended Direction: **Online Ordering & Delivery Expansion** (Decision Support Score: 0.8575)

Rank	Strategy Name	Focus Area	Est. Capital	Score
#1	**Online Ordering & Delivery Expansion**	Growth	N/A	0.8575

6. Time-Phased Action Roadmap

Phase 1: Immediate Launch Preparation (0 – 3 Months)

- Finalize expansion site agreements, space layout, and legal compliance for FreshMart Grocery.
- Configure online ordering and delivery expansion for FreshMart Grocery in Colombo.
- Reallocate core senior staff to oversee expansion preparation.

Phase 2: Operational Stabilization (3 – 12 Months)

- Complete interior fit-out and equipment installation in Colombo.
- Conduct pilot test runs and soft-launch to existing loyal customer database.
- Monitor additional monthly operating burn strictly against LKR 21,250.00.

Phase 3: Growth & Expansion (1 Year+)

- Execute full commercial expansion launch targeted at 69 additional daily patrons.
- Conduct comprehensive payback review against initial investment.

7. Assumptions & Important Disclosures

- Feasibility classification and decision rankings are model-based analytical estimates derived from Sri Lankan SME empirical datasets.
- Financial projections assume 26 active operating days per calendar month and steady unit pricing.
- External macroeconomic conditions, tax policy alterations, and unexpected inflation are not dynamically modelled.
- Entrepreneur should perform on-the-ground market validation before committing heavy capital investments.
